

# Learning to classify Morals and Conventions: Artificial Intelligence in Terms of Economics of Convention

David Solans, Christopher Tauchmann, Aideen Farrell, Karolin Kappler,  
Hans-Hendrik Huber, Carlos Castillo, Kristian Kersting

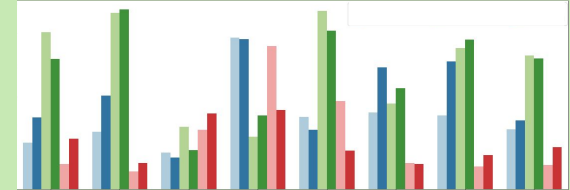

Convention	Common Good / Motivation
Industrial 	Increased efficiency
Market 	Economic growth
Renown 	Public opinion
Project 	Innovation / Network
Inspired 	Inspiration
Civic 	Collective will
Domestic 	Tradition
Green 	Environmental protection

**Economics of Convention**  
defines 8 different conventions or justifications used by individuals in conflicts.

Theory

Which conventions or moral orders guide the development and research as well as the social perception of AI?

Results

- **Reddit** balanced, reflecting the variety of topics
- **Github** mostly industrial convention
- **S2** mostly industrial and inspired conventions

Dataset

Method

Dataset from three areas of human conversation on AI:

Active learning and models training
